CAREER OBJECTIVE

Recent graduate aspiring to launch a career in Data Science and Artificial Intelligence, eager to apply analytical expertise and technical proficiency to real-world challenges. Committed to driving innovation through data-driven solutions, mastering emerging technologies, and delivering impactful results. Passionate about extracting meaningful insights from complex datasets to support strategic decision-making and organizational success

KEY SKILLS

Programming Languages : Python | SQL | Object-Oriented Programming
Machine Learning : Model Training | Implementation | Algorithmic Problem Solving
Data Analytics : Statistical Modelling | NLP | MLOps | Deep Learning
Tools and Technologies : Jupyter Notebooks | Scikit-Learn | TensorFlow

INTERNSHIPS

Intellipaat software solutions Pvt Ltd | Remote

Nov '22 - Apr '23

Data Science and AI Intern

- Utilized **Python, SQL, and Machine Learning concepts** to drive real-world projects, gaining valuable practical skills
- Developed **sophisticated machine learning models** and executed thorough data analysis
- Made data processing and **algorithmic techniques** to solve practical problems with precision

PROJECTS

Flight Ticket Price Prediction

Utilized Python along with Pandas, NumPy, Scikit-Learn, and Matplotlib for data analysis and visualization

- Built a **machine learning model** to predict flight prices using **300,153 records**, analyzing airline, duration, and timing features for accuracy
- Delivered actionable insights to optimize pricing strategies and effectively forecast ticket costs with **89% accuracy**

Customer Churn Analysis

Leveraged Python with Pandas, NumPy, Scikit-Learn, Matplotlib, and Seaborn for data analysis & visualization

- Enhanced **customer retention strategy** by creating a predictive model to identify customer churn. Analyzed and processed data for a large volume of **7,043 customers**
- Provided **valuable insights with 77% accuracy**, enabling the organization to execute effective retention strategies and reduce churn rates

Dog Breed Classification

Utilized Python with TensorFlow/Keras, leveraging VGG and ResNet architectures for deep learning and image classification

- Built and trained a **CNN model** to classify dog breeds by analyzing and processing **10,000 images across 120 categories**
- Achieved **70% accuracy in breed prediction**, showcasing the model's potential for real-world applications like pet identification and veterinary assistance

CERTIFICATIONS

- Attained Advanced Certification in **Data Science and Artificial Intelligence** from IIT-Madras & Intellipaat

EDUCATION

Rajiv Gandhi University of Knowledge Technologies | | Kadapa
RK Valley

May '24

Bachelor of Technology - Computer Science and Engineering - 7.6 CGPA
